

STEAM BOILERS 50-300 kg/h

With gas- or oil-burner

Specification:

- RIELLO gas or oil burner
- cover of fire chamber and smoke passage in stainless steel
- corresponding to CE- und PED- rules 97/23/CE
- water pipe boiler construction with 4 smoke circuits
- fast steam supply and high performance
- automatic drainage
- including stainless steel feed water tank, water pump, automatic level and temperature control, all necessary taps, valves, and security devices
- boiler and components completely installed on a stainless steel base pallet, ready for connection
- no further installation work needed, except connection for water, electricity, drain, gas or oil, steam, exhaust
- outside insulation with polished stainless steel covering

model	heat input KW	steam output kg/h	max. working pressure bar
50	34,7	50	7
100	75,6	100	7
150	112,7	150	7
200	151,2	200	7
250	189	250	7
300	226,7	300	7

el. connection 400/3+N/50Hz
needs softened water!

Options:

- high temperature pump for big amount of condensate
- feed water heating
- automatic start/stop
- water softener, dosing device, etc.
